PROFILE

Creative and technically grounded junior UX and Product Designer with a specialism in accessible, inclusive design. Final year dissertation project NeuroLearn is a fully working, WCAG 2.2 AA compliant web application for neurodivergent students — designed end-to-end from user research and Figma prototyping through to Flask/Python development and usability testing. Equally comfortable conducting user research, crafting high-fidelity Figma prototypes, and writing production code. Strong communicator and natural collaborator, with real-world leadership experience and a passion for building technology that genuinely improves people's lives.

SKILLS

UX & Product Design: End-to-end design process · User research · Wireframing · Prototyping · Usability testing · Information architecture · Interaction design · UX copywriting

Accessibility: WCAG 2.2 AA · Inclusive & neurodivergent-informed design · Screen reader compatibility · High-contrast & low-stimulus UI · GDPR privacy-by-design

Design Tools: Figma · Figma Make · TinkerCAD · Web design · Visual merchandising & campaign design

Technical: Python · Flask · SQLite · HTML/CSS · JavaScript · Web Speech API · Java · Git/GitHub

Soft Skills: Stakeholder communication · Team leadership · User advocacy · Agile ways of working · Time management · Working under pressure

UX & PRODUCT DESIGN PROJECTS

NeuroLearn — Privacy-First Study Tool for Neurodivergent Students 2025 – 2026

Final Year Dissertation · Goldsmiths, University of London · github.com/elizazh/neurolearn_33750790

Fully working, deployed web application designed to close a genuine gap in accessible study tools for students with dyslexia, ADHD, and ASD. The only tool combining structured summaries, multimodal output, attention scaffolding, and GDPR-first privacy controls in a single calm interface.

- Led the entire design process: competitor analysis, user personas, low-fidelity sketches, and high-fidelity Figma prototypes — all before writing a single line of code.
- Built four reading modes (default, low-stimulus, high-contrast, dark high-contrast), font size/line spacing sliders, and reduced motion toggle — all WCAG 2.2 AA compliant.
- Implemented text-to-speech with real-time line highlighting, Pomodoro focus timer with micro-task checklist, and on-device extractive summariser — zero external API calls.
- Enforced privacy-by-design throughout: consent gate, 7-day auto-deletion, one-tap data wipe — fully GDPR compliant.
- Achieved 80%+ task completion rate and SUS usability score of 70+ across pilot user testing.
- Presented at Goldsmiths end-of-year exhibition to an audience of industry professionals and academics.

UniAccess — Accessible Student Support App for Autistic Students 2025 – 2026

Module: Designing Accessible Interfaces · Goldsmiths, University of London

Mobile-first Figma prototype for a student support app designed to reduce cognitive overload for autistic university students — combining assignments, timetable, messages, and accessibility settings into one calm, predictable interface.

- Designed six detailed screens in Figma: Dashboard, My Assignments, Timetable, Messages, and Accessibility Settings (light and dark modes).
- Built two detailed user personas and full user stories grounded in NHS autism guidance and W3C cognitive accessibility research.
- Designed accessibility settings panel with dark mode, reduced motion, simple layout, and adjustable text size — mapped directly to WCAG 2.2 success criteria.

- Produced full developer handoff document covering semantic HTML, CSS focus styling, JS preference persistence, and WCAG 2.2 compliance table.
- Conducted simulation-based usability testing: keyboard-only navigation, zoom, and screen reader methods.

EXPERIENCE

Retail Assistant & Weekend Manager May 2024 – Present

British Heart Foundation, Brentwood

- Managed full weekend store operations independently, balancing leadership alongside final-year studies.
- Led volunteer recruitment, interviews, and onboarding — maintaining a high-performing team week to week.
- Designed seasonal window displays and campaign visuals to hit sales targets, applying UX and visual design thinking to physical retail.
- Grew e-commerce revenue through eBay and Shopiago, applying product and merchandising strategy.

Founder & Owner 2024 – Present

Independent E-Commerce Business (eBay / Vinted)

- Launched and run an independent vintage fashion resale business, pivoting strategy based on market research.
- Developing a full customer-facing webstore, applying UX, web development, and product thinking end-to-end.
- Manages all aspects: product curation, pricing strategy, customer experience, fulfilment, and marketing.

Pharmacy Assistant September 2023 – March 2024

Shadforth's Pharmacy, Ingatestone

- Supported customers with prescription enquiries in a fast-paced, high-stakes clinical environment.
- Demonstrated strong empathy, discretion, and communication skills working with vulnerable patients.

Trainee Dispenser / Counter Assistant May – August 2023

Well Pharmacy, Chadwell Heath

- Commenced NVQ Level 2 Counter Assistant qualification; liaised directly with GP surgeries on urgent prescriptions.
- Rapidly learned new dispensing software and pharmaceutical workflows under pressure.

Trainee Healthcare Partner December 2022 – April 2023

Lloyds Pharmacy, Brentwood

- Advanced NVQ2 medication dispensing training; demonstrated resilience and adaptability during unexpected store closure.

EDUCATION

Goldsmiths, University of London 2022 – 2026 (expected)

BSc Computer Science (User Experience) · Predicted 2:1 · 4-year foundation programme

Relevant modules: Designing Accessible Interfaces (79%) · AI & Machine Learning · Human-Computer Interaction · Software Engineering · Web Technologies · UX Research Methods

St. Martin's School, Brentwood Completed 2022

A-Levels: Product Design (B) · Business (B) · BTEC Media (C)

GCSEs: 9 subjects — Mathematics (4) · English Literature (4) · Business (6) · Media (6) · Graphic Design (6) · and 4 further subjects

INTERESTS

Accessible & inclusive design · Sustainable & vintage fashion · E-commerce & entrepreneurship · Web & game development · Freelance makeup artistry (self-taught since age 8) · Baking & fitness
